## Letter to the principal

22<sup>nd</sup> November, 2019

Dear Miss Ng,

We are writing to tell you the problems the people face in China and suggest ways to help them. I think they are poor so we want to help them.

The children there face many problems in China. They don't have enough food or articles for daily use, like toothpaste and shower gel. Moreover, they don't have any education. Some children can't go to school because they are too poor. There are very few schools so they can't be educated. Some schools do not have enough teachers to teach students. As the teachers' salary is too low, no teachers want to work there. The next problem is that the children don't have enough books to read and learn. They don't have enough money to buy books. They can't buy stationery either so they often write on the sand with stick. They are too poor.

Here is some advice to help the children there. We can donate money to the poor children. We can sell flags or raffle tickets to raise money for charity. If they have money, they can buy the things they need. We should recruit more teachers to teach students too. We can raise the salary of teachers. Also, we can find some voluntary teachers to teach the poor children.

I hope you will help us organize the charity events.

Yours sincerely,

**Yuki Yu**

Chairperson of the Charity Club

*Teacher's comment: Nice format and flow! I like your elaborations of the problems. Good try of using different connectives!*

## About me

My name is Leung Yiu Him. You can call me Henry. I am eleven years old. I live in Sai Wan. I study in Li Sing Primary School.

I think I am humorous, friendly and helpful. I always make people laugh. I can speak fluently. I am also nice to other people. I am good at General Studies. I often get high marks in tests and exams. I am good at doing Taekwondo too. I have red and black belt now. Although I am weak in Maths, I will try to do more exercises so that I can make some improvement.

On Saturdays, I like doing Taekwondo in the activity centre so that I can learn how to protect myself. I like playing computer games in my spare time because it is exciting.

I want to get into Clementi Secondary School because there is a big basketball court and my brother also studies there. I expect there will be a lot of empathetic teachers and I won't have too much homework. I will study hard there.

*Teacher's comment: Nice ideas! I like your elaborations of ideas!*

*Good try of using different connectives!*

## My dream job

There are a lot of jobs in the world, such as teachers, nurses and salespersons. What is your dream job? My dream job is to be a doctor. I want to be a doctor because I want to help sick people. It is a meaningful job so I want to be a doctor. If I become a doctor, I will save people's lives.

Doctors need to have a university degree. They need to have a lot of knowledge about germs and medicine. They also need to speak Chinese and English fluently because they need to communicate with different kinds of people.

I think this job is suitable for me because I am caring. I always take care of my classmates. I am also hard-working and clever. I will study hard to get a university degree. I will try my best to help people so that they can get better in a few days. I will work hard so that I can go to a band-one secondary school and a good university to make my dream come true.

*Teacher's comment: Nice beginning! Good use of different connectives! I hope you can be a doctor one day.*
